

novaMSC

new frontiers for e-government & healthcare

INTRODUCTION

novaMSC is a leading provider of ready-to-deploy application software for the e-Government and Healthcare industry. Our products are developed based on our sound technical knowledge and in-depth understanding of the e-Government and Healthcare industry. As a result, our customers are benefiting from solutions that overcome the business challenges of today.

Through our alliances and partners, our products have reached different corners of the world such as Thailand, Vietnam, Hong Kong, China and Europe.

PRODUCT EXCELLENCE

Since our inception, novaMSC has dedicated significant resources to developing innovative solutions via a strong emphasis on Research & Development (R&D). Today, we continue to invest in this strategic program and also collaborate with the industry leaders and our customers to identify needs & priorities for R&D.

On 29 October 2002, novaMSC was granted the MSC status awarded by Multimedia Development Corporation (MDC).

This status promotes undertaking and participation in Information Technology (ICT) activities in the MSC and as

a result, supports our R&D endeavour to enhance existing modules and pioneer new ideas. For our customers who value long-term partnerships, this continuous process of product improvement will ensure that we remain relevant to the industry and provide them with future growth paths.

Steadfast commitment to industry standards ensures that our products remain easily integrateable with other best-of-breed solutions.

E-GOVERNMENT PRODUCTS

PAVO™ - Collaborative Framework for e-Government that enables government agencies and private sector to collaborate and carry out any forms of transactions over the Internet. PAVO™ can facilitate secure online submission of application documents, such as managing interaction between the government departments and provides e-services to applicants.

OCTANS™ - Council Management System that consists of products that supports operations in local government organizations such as city, municipal & district councils in managing land planning & development, property valuation and provision of essential city services such as carpark, street lighting, refuse disposal and parks management.

FORNAX™ - Plan Check Expert is a revolutionary product that promises huge savings to Building and Construction Industry. FORNAX™ significantly lowers dependencies on skilled resources for both the regulatory bodies and building professionals to perform this compliance checking through standardization and automation.

HEALTHCARE PRODUCTS

VESALIUS-HIS™ (Hospital Information System) - Designed to comprehensively improve communications and patient services within a hospital without escalating costs or resources. Deployable on a modular basis, VESALIUS-HIS™ is cost-effective for smaller hospitals and scalable for larger hospitals.

VESALIUS-CIS™ (Clinical Information System) – supports clinical care processes such as doctor-patient consultation and review of investigative results in a multi-disciplinary environment. At the core of the system is the Electronic Medical Record and all the intelligent features related to patient safety during the course of care.

PROVEN TRACK RECORD

The success of our products can be seen in the number of local and international installations that we have accomplished. Our client list include large and reputable organizations such as Putrajaya Corporation, Penang Adventist Hospital and Kumpulan Perubatan Johor in Malaysia, Urban Redevelopment Authority, Building Construction Authority, Land Transport Authority and Singapore General Hospital in Singapore, Rumah Sakit Pondok Indah in Indonesia and FTU Clinics in Hongkong.

Our commitment to quality is soundly backed by ISO Certification in our subsidiaries. Our processes

– design, development, testing and documentation and stringent standards are practiced in accordance with the defined standards to ensure that consistently high quality of work is always delivered to our customers.

PROFESSIONAL SERVICES

In other aspects of project implementation, novaMSC provides our clients with the following professional services:

- Consultancy - we render consultancy services to clients to define their user requirements and formulate them into an IT plan.
- Implementation & software customization - we assist our clients to implement their solutions optimally and whenever

necessary, customize the application software to their requirements, and to develop interface software to link with clients' existing software systems. Where necessary, we may develop new functionalities outside the product range, to cater for specific clients' needs.

- Education and Maintenance - training can be provided to our clients to ensure that our clients are able to use our software products. Maintenance of our software and systems are also provided.
