

Government, Education & Healthcare Partner News – 1st Edition

INDUSTRY HIGHLIGHTS

Thanks to our partners, the first half of FY06 witnessed significant progress and positions GEH to continue the momentum for rest of the fiscal year. Improved organizational alignment with a stronger customer and partner commitment fueled further dominance in our technology business while increasing Oracle's competitive advantage in applications market share. GEH customers and partners have more choices than ever, and more and more are realizing the benefit of the combined companies of Oracle, PeopleSoft, JD Edwards and Oblix.

In the second half of FY06, GEH will continue to focus driving demand in each of the three sub-sectors by building demand generation programs, including:

- Public Expenditure Management
- E-Government
- Shared Services
- Campus Solutions
- Healthcare Solutions
- Human Capital Management
- Data Center Consolidation

Healthcare Solutions

Healthcare organizations confront enormous challenges: spiraling costs, staffing shortages, increasingly strict regulatory mandates, rising patient expectations, constrained reimbursements and so on. To meet all these business challenges while providing the highest-quality care, Oracle for Healthcare delivers a powerful combination of technology and comprehensive, [pre-integrated business applications](#), including key functionality built specifically for private and government healthcare providers.

Oracle offers a unified data model for managing huge volumes of patient and insurance information, ensure regulatory compliance, and procure and manage materials as economically as possible. [Oracle Healthcare Transaction Base](#) integrates critical data from all source applications, giving a true 360-degree view into the healthcare organization. It optimizes performance, streamline support, and maximize ROI.

Partners :

□ Clinical & Hospital Information System: novaHEALTH

Contact : libby.lee@oracle.com

novaHEALTH is the leading provider of a total hospital information system to health institutions in the Asia Pacific region. novaHEALTH has a comprehensive line up of software solutions to assist healthcare professionals in the management of their facilities and treatment of patients.

VESALIUS - CIS™ (Clinical Information System)

Core to VESALIUS - CIS™, is our Clinical Management System (CMS) was designed to provide caregivers a desktop to perform e-prescription, investigative orders, improved patient education, clinical care and documentation in a multi-specialty environment. The system tracks all notes made by the physician and presents the Electronic Medical Record (EMR) in a logical & structured way. There is a capability to perform body charting on images & tag digital photographs of clinical encounters with these charts allowing physicians to graphically follow the patient's treatment progress and disease outcome.

VESALIUS - HIS™ (Hospital Information System)

VESALIUS - HIS™ is intended primarily to support the complete workflow of a hospital - from the moment the patient walks into the healthcare facility and registers, up to the billing & discharge stages. Most importantly, VESALIUS promptly provides all the relevant and accurate information at every point of service to ensure a pleasant experience for the patients.

SUCCESS STORIES

A PAPERLESS' HOSPITAL: NATIONAL SKIN CENTRE, SINGAPORE

Customer Profile :

National Skin Centre,
Singapore

National Skin Centre (NSC) is the national and regional referral centre of excellence for the diagnosis and treatment of skin diseases.

Industry :

Healthcare

With approximately 220,000 patient visits per year, NSC is plagued with problems of long waiting times, delays in the handling of 250,000 medical records and overall service levels. VESALIUS, the 'paperless' system was implemented and went 'live' in March 2004 by novaHEALTH Pte Ltd. This is an integrated and truly 'paperless' system.

Oracle Products &

Services :

- Oracle 8 Database
- Oracle 11i Financials

NovaHEALTH Products :

VESALIUS - Total Hospital
Information System

The system house the entire 250,000 medical records with a total 2.5 million of scanned pages. Retrieval of patient records can now be performed at the click of a button. There is significant increase in patient safety with reduction of errors in reading illegible handwritings, medical alerts and intelligent checks for prescriptions against patient's drug allergies.

Key Benefits :

- Improvement to Level of Patient Safety
- Reduction in Patient Waiting Times

Most notably, the radical improvement in patient waiting times lauded praises from patients themselves who spend at least 30 minutes lesser for each visit. Today, NSC commits to rebate patients in the event they waited more than 75 minutes for consultation. From the time the patient registers to the time the patient completes his visit, information are flowed seamlessly across the entire centre, various department and electronically by the integrated system.

Oracle is the database platform for VESALIUS and the financial solution for NSC.
